Opis produktu

Let you be away from the trouble of punctured or flat tire. The design of large tire tread enhances the scooter's trafficability. High density, high strength solid rubber is not only not afraid of being punctured, but also more wear-resistant with longer service life. The honeycomb design makes that the rubber wheel has a better shock absorption performance. New design of folding structure, not only to solve the user's handling and storage troubles, but to make the folding shackle more stable and durable, makes your travel more safe.
