Cena	<b>927,18 zł</b>
Czas wysyłki	<b>24 godziny</b>
Numer katalogowy	<b>1392131</b>
Kod EAN	<b>6973734683808</b>

### Opis produktu

#### **Uniform cleaning without cable.**

The R10 Pro offers a uniform and powerful suction power of 120 AW with an independent motor, which guarantees exceptionally even suction power during cleaning. The design of the luminaires on the brush head improves the cleaning performance.

#### **Brings light into dark corners.**

Light up dark spots and corners with the bright LEDs to remove dirt and dust that would otherwise have remained hidden to you. Thanks to bright LEDs, dirt and dust are also removed in otherwise inaccessible areas, e.g. behind furniture and in dark spaces.

#### **Versatile vacuuming**

This multi-surface brush with an ingenious front opening removes hair, dirt and other residues from different soil types, while came-like teeth detangle hair and thus ensure easy and comfortable cleaning.

Thanks to the innovative design of the brush opening, even large residues and particles can be absorbed on carpets.

#### **Cleaning for various purposes.**

With the V-shaped multi-surface brush, sucking hair is a breeze thanks to the kamm-similar teeth.

The came-like teeth help to untangle hair and transport hair absorbed directly into the dust container. This ensures easy and quick cleaning.

Combination attachment for cleaning the entire home.

By using the combination attachment, you can easily increase your range of motion. Extend the brush to thoroughly clean keyboards, or insert the brush to reach hard-to-reach places behind a bookshelf.

#### **Includes the dust.**

The advanced five-layer filter system detects fine dust and particles and filters them out of the air with a filter performance of up to 99.9%. The advanced multicone dust filter filters dust from the air, keeps the air fresh and ensures that dust reaches the dust container. This can be emptied with just a single click.

#### **Easy cleaning, even easier maintenance.**

Thanks to the replaceable battery, the removable dust container, the filter components and the multi-surface brush, maintenance is child's play.

#### **Effortless after-clean process.**

Both the multiconus cyclone and the filter, the brush roller and the pre-filter are washable. This makes cleaning extremely easy.

#### **Practical storage with easy access.**

---

The wall bracket allows easy access and convenient storage of your vacuum cleaner.
