Opis produktu

The Portable Power Station Explorer 2000 Pro delivers enormous charging capacity (2,160Wh) powering all your required appliances including hot plates, blenders, air conditioners and more. It's also ideal to use for outdoor off-grid activities (camping or RV) & home emergency use.

The power station can be fully charged with 6 SolarSaga 200W solar panels in only under 2.5 hours, and in just 2 hours via AC wall outlet. This fantastic charging experience allows you to charge away in no time while off the grid.

The first-rate lithium battery houses two chips for dual battery protection and four temperature core detectors, guaranteeing the perfect blend of safe and reliable charging. Taking safety to the very next level.

With a simple press of a button, the access to outstanding charging efficiency becomes available in seconds. The Explorer 2000 PRO delivers under 53DB of charging ensuring quiet and peaceful charging.

The portable power station supports pass-through charging. This allows you to charge your power station, with essential devices still plugged in, meaning you can charge on the go quickly and conveniently.
